Summary

I am a writer who specializes in teaching intelligent activities like Chess and computer Programming made accessible to low-income people with books and Free and Open Source Software. However, my recorded work history is all retail and warehouse jobs.

Education

Full Sail University

- Associate of Applied Science in Creative Writing (A.A.S.) - July 2025

Experience

Wal-Mart

Overnight Maintenance Associate - October 2025 - Present

- Sweeps, mops, and scrubs floors with proper equipment
- Loads and unloads trucks
- Makes cardboard bales
- Cleans bathrooms and empties trash of whole store

Overnight Stock Team Associate - September 2023 - October 2025

- Stocked Food and General Merchandise until 5 AM. Moved to other departments as instructed.
- Removed all trash and pallets from floor before customers arrive at store opening and then assist customers in locating and purchasing merchandise. Organized shelves until 7 AM.
- Start work in assigned area at 10 PM. Report work progress to Coaches and Team Leads through the night.

GameStop

Game Advisor - June 2022 - February 2024

- Greeted customers and sold requested games and merchandise.
- Answered technical questions based on experience and reading materials employees were given.
- Promoted Gamestop Pro-Membership and explained how it saves money to recurring customers of over \$60 annually.

Hy-Vee

Floral Clerk and other Departments - October 2012 - July 2023

- Stocked Health Market and Health and Beauty Department.
- Wrote down Floral Delivery orders both in person and over the phone. Prepared these orders for pickup or delivery. Acted as Cashier at Floral Register. Regularly served over 100 customers on each Valentine's Day and Mother's Day.
- Sold items to customers, watered plants, and cleaned the shop before closing at 7 PM.

Brilliant

- General Clerk - June 2019 - April 2021
- Kept records and tracked files at the National Records Center containing 17 million files.
- Sorted incoming files to the facility and entered barcode numbers into the computer database managed by the Department of Homeland Security. Maintained Data Entry quota of 400 files per hour.
- Placed files on the shelves and kept locations recorded digitally and on paper. Maintained Quota of 160 files per hour.

Book Publications

- [Chastity's Chess Chapters](#) - authored a 100 page paperback and e-book to train Chess players.

- [Assembly Arithmetic Algorithms-DOS](#) - authored a book on Assembly language for the DOS operating system.
- [Minimal Markdown for Authors](#) - How to Write and Publish a Book Using Open Source Software
- [Chandler's Honesty](#) - authored a series of mental health conversations with a unicorn since 2017.
- [The Elevator Debate](#) - composed a flash fiction story about a political disagreement between co-workers.

Video Game Publications

- [Chaste Tris](#) - Published a relaxing clone of Tetris with no gravity to be used as a teaching tool. Released May 31, 2022.
- [Chaste Chess](#) - Published a small tool for creating animations of Chess games. Released on itch.io May 18, 2025.

Skills

- Writing (Markdown, Pandoc, LibreOffice, Joplin, Simplenote, Microsoft Word)
- Chess Teaching (lichess.org, chess.com, En-Croissant, ChessX)
- Graphic Design (Inkscape and GIMP)
- Video Recording (OBS-Studio, Zoom, StreamYard)
- Audio/Video Editing (Audacity, Kdenlive)
- Book Publishing (Kindle Direct Publishing, Draft2Digital, Leanpub)
- Computer Programming (C, Assembly)

Software Skills

I have provided a summary of the top skills or software tools I have experience in.

Markdown

Markdown is a Markup language that is an alternative to HTML. I have used it to save me time when writing books and essays for school assignments. The strength of Markdown is that it does not depend on specific software or operating systems because it is a pure text language.

LibreOffice

I have been using LibreOffice and its older relative, OpenOffice, since my teenage years. The Writer part of the LibreOffice suite is what I have used for all documents where page sizes and numbers mattered. It was the only program I needed to publish my paperback books through Amazon from 2013 to 2024. After that, I started using Markdown in combination with LibreOffice to support quick writing and then formatting adjustments with LibreOffice when necessary.

Microsoft Word

I learned to use Microsoft Word during my time at Full Sail University. I never had much personal interest in it because it would cost money to pay for a subscription, but it is not very different from LibreOffice Writer and can be used for any of the same tasks.

Inkscape

Inkscape is the vector graphics program I use, which is equivalent to Adobe Illustrator in features. I used it to design all the pictures for my Chess book because I needed all the pieces and squares perfectly aligned to a grid. If someone needs a simple image made, I can usually come up with something in Inkscape quickly. I once designed a logo for someone, and they paid me \$200 because they were very pleased with it.

Video Production

I can stream and record videos using OBS Studio. Once I have a video file, I can do some basic editing, such as clipping, joining, and adding text and audio to any part of a video. I use Kdenlive as my video editor because it has the most features of any Open Source video editor I use.

Chess Teaching

I am highly skilled at playing Chess as well as using the previously mentioned skills to write, design pictures, and record videos designed for teaching the rules and my favorite strategies for winning at Chess. More than anything, Chess can be used to measure the intelligence and patience of a person. The number one reason people lose at Chess and in life is because they resign too easily.
